Skills

Languages: Apex, Python, Go, TypeScript, JavaScript, HTML/CSS, Java, Lightning Web Components, SQL
Tech Skills: Software Engineering, Salesforce, Git, GitHub Actions, Jira
Leadership: Leading teams, mentoring developers, product management

Experience

Lead Software Engineer @ Guideline   *October 2024 – Present*
- Built CI/CD pipeline using GitHub Actions for Salesforce deployments - saving thousands of dollars per year
- Created a custom Slack integration using the Slack Deno SDK - reduced hours spent per week from manual entry
- Implemented event routing system in Salesforce to send data to Iterable for marketing journeys
- Contributed to Ruby on Rails codebase - breaking down developer silos to enable integrations

Sr. Software Engineer | Tech Lead @ Torqata / ATD   *Feb 2023 – September 2024*
- Technical lead for Customer Engagement team - organizing meetings and driving initiatives
- Automated sales processes with Apex, syncing customer data in real-time to a Postgres database hosted in GCP
- Automated CI/CD release pipeline using GitHub Actions - vastly reducing time spent manually deploying
- Helped build onboarding app built with Python (Fast API) and Angular - automating the entire customer journey
- Developed webfront with Java and Angular on a multi-million e-commerce platform

Software Developer @ Deloitte   *July 2019 – Feb 2023*
- Led Salesforce development team and oversaw releases for projects contracted by the federal government
- Improved front-end experience using Salesforce's Lightning framework (JavaScript, HTML, CSS)
- Built a weekly batch job that generated millions of lines of data and resolved long standing performance issues
- Automated data loading tasks using Python REST API wrapper

Software Developer Intern @ Siemens   *May 2018 – June 2019*
- Automated data migration in AWS S3 buckets - improving data quality
- Maintained the back-end and front-end for an internal customer portal

Projects

Go-Salesforce | *k-capehart/go-salesforce*
- An open-source Salesforce REST API wrapper written in Go (40+ stars)
- Enables Go developers to integrate with Salesforce and export/import large datasets

SF CLI Plugin | *k-capehart/kc-sf-plugin*
- An open-source plugin written in TypeScript for the Salesforce CLI that automates dev tasks (10+ stars)

Open Source Contributions
- Contributed to the official SF CLI, a command line interface built with Node.js

Education & Certifications

University of Central Florida

B.S. in Computer Science   *Jun 2019*

Salesforce Certifications

Platform Developer II, Platform Developer I, Platform App Builder, Administrator
